ARKRAY, Inc. Offers MyCareTeam™ Disease Management Software to Diabetes Patients

Edina, Minn. – June 23, 2009 – ARKRAY, Inc., the world's fifth largest manufacturer of diabetes self-monitoring systems, today announced that it will make MyCareTeam's Internet-based diabetes management system available to patients.

The agreement, which takes effect immediately, gives diabetes patients using GLUCOCARD® Blood Glucose Monitoring Systems the ability to monitor and manage their disease online and share real-time data with their health care providers.

“From our existing patient wellness program to our assortment of free education and support materials for patients and health care providers, ARKRAY has an obligation to extend every advantage to diabetes patients using our products,” said Jonathan Chapman, president of ARKRAY, USA. “This agreement with MyCareTeam extends our commitment to patients by helping them go beyond monitoring their diabetes and take steps toward actively managing it.”

MyCareTeam's diabetes software allows people with diabetes to regularly transmit their blood glucose readings directly from their GLUCOCARD meters to a secure database via the Internet or standard phone lines. Once the data is stored, physicians, care providers, and family members can use the tool to monitor glucose levels, understand lab values, and examine the effects that exercise and diet have on a patient's health.

“We are very excited about the opportunity to work closely with ARKRAY”, said Jim Mingle, CEO of MyCareTeam. “The combination of ARKRAY's GLUCOCARD meters and MyCareTeam's diabetes management software will benefit all of those who suffer from diabetes.”

About ARKRAY USA

ARKRAY manufactures and distributes high-quality, cost-effective products that are simple, convenient, and easy-to-use, including blood glucose meters, test strips, safety lancets, and urine chemistry. ARKRAY invests heavily in R&D and has a strong commitment to high-quality products. For patients, this means access to cutting-edge, reliable products without sacrificing quality, and exceptional customer service.

About MyCareTeam, Inc.

MyCareTeam, Inc. was founded to provide software offerings that are designed to help people with diabetes to collaborate and manage their illness while reducing overall healthcare costs. The company's diabetes offering, MCT-Diabetes, has been successfully used for over five years by patients, doctors and nurses to dramatically improve the health and wellness in people with diabetes and reduce overall healthcare costs. MyCareTeam is headquartered in Acton, Massachusetts and the company's website is www.mycareteam.com.

MyCareTeam recently announced integration of MCT-Diabetes with Google Health. Google Health allows consumers to enter and maintain their own basic medical data and electronically send that information to systems which are connected to Google Health. MyCareTeam's diabetes management software, MCT-Diabetes, integrated with Google Health, will allow consumers to securely transfer diabetes related information to and from the Google Health medical data repository. The data can be transferred to any other medical applications that are also integrated with Google Health.

Visit the company's website at www.mycareteam.com for more information.
