

Management Team

MyCareTeam, Inc's executive management team has deep experience in both the software and healthcare industries. The founding team combines proven experience building and selling software applications, vast clinical expertise, and a broad understanding of electronic healthcare management and telemedicine.

Jim Mingle, *Founder, President & CEO*

Jim Mingle is President & CEO of MyCareTeam, Inc. and has over 20 years of marketing, sales, and executive management experience in the medical software and high tech software industry. Mr. Mingle has a proven track record of building companies and new divisions of companies to generate profitable revenue and programs that allow stockholders, founders, and investors to obtain value for their work and investments.

Prior to founding MyCareTeam, Mr. Mingle was an Operating Partner & MGP at VenGrowth in Toronto, Canada. As the designated turn around partner, Mr. Mingle ran operational committees within VenGrowth and within investment companies. He was actively involved with managing five investments during his tenure at VenGrowth. Mr. Mingle was acting CEO for two companies and ran the operational committee for three. Four of the five companies were restructured by Mr. Mingle and became profitable.

Before joining VenGrowth, Mr. Mingle was President/COO of The Mesa Group (Newton, Ma.) which he helped sell to Microsoft. Mesa was profitable every quarter since Mr. Mingle joined the company and doubled sales every quarter until the company was purchased by Microsoft. Additionally, Mr. Mingle served as Executive Vice President of Sales and Marketing and head of the U.S. Operations at LinkAge Software, Inc. which was sold to Microsoft.

Before LinkAge, Mr. Mingle was Director of Worldwide Sales in the Emerging Product Group at Lotus Development Corporation. At Lotus, Mr. Mingle helped build a new specialist sales team that focused on orphaned or new products. Mr. Mingle's experience at Lotus also included building Lotus' vertical focused sales organization to call on independent software vendors in the medical industry to develop or port their applications to Lotus Notes.

Mr. Mingle's experience includes selling MUMPS (Massachusetts General Hospital Utility Multi-programming System). Mumps-based systems were deployed heavily into the medical field, including the Veteran's Administration, Harvard Health, Mass. General Hospital, and thousands of software vendors developing applications for the medical industry.

Mr. Mingle holds a BS degree in Industrial Management from Northeastern University where he graduated with high honors.

John Paglierani, *Founder, CTO & VP of Development*

With over eighteen years of enterprise software application experience, John Paglierani has a proven track record for the delivery of robust, scalable, and easy to use products. Mr. Paglierani has been involved in the design, management and integration of quality software applications. He has worked on applications ranging from off-the-shelf products to large-scale web based, all the while instituting a high standard of quality.

For the past five years, Mr. Paglierani served as Chief Architect and Director of Engineering for Phase Forward Corporation where he oversaw the architecture for three major product lines as well as the day to day management of Inform, Phase Forward's flagship product. Phase Forward is the leading provider of data management solutions for clinical trials and drug safety, offering proven solutions in electronic data capture (EDC), clinical data management (CDM), and adverse event reporting (AER) as either an integrated solution or as stand-alone applications. The company had its IPO in June, 2004 and reached a \$300 million dollar valuation.

Prior to Phase Forward, Mr. Paglierani served as an architect at Perot Systems Corporation. He was responsible for the design of the overall systems architecture, scalability, and rollout for several of Perot Systems' largest customers. He designed user friendly products, integrated customer requirements and was instrumental in the delivery of the largest multi-vendor e-commerce web sites.

Before Perot Systems, Mr. Paglierani was co-founder in The Mesa Group. As a founding partner, Mr. Paglierani was responsible for developing both Conference+ and a Lotus Notes to Microsoft Exchange replication engine, JumpStart. The MESA Group was acquired by Microsoft who has subsequently integrated the JumpStart product and other applications into the Microsoft Exchange Server.

Mr. Paglierani holds a Bachelor of Science degree in Computer Science from the Wentworth Institute of Technology.

Stephen C. Clement, MD, *Founder & Chief Medical Advisor*

Dr. Clement is chief of the Georgetown Diabetes Center at Georgetown University Hospital. He also serves as interim Chief of Endocrinology, Department of Medicine, Georgetown University Hospital. In addition to running the Diabetes Center, Dr. Clement is active in clinical research, performing clinical trials on the development of oral insulin, the use of insulin to prevent cardiovascular disease, and in the prevention of Type 2 diabetes with pharmacotherapy. He has published widely and is a recognized international leader in the area of diabetes care.

Dr. Clement first became interested in diabetes as a first year intern at Charity Hospital in New Orleans where he found that more than 70% of his patients had diabetes. This interest carried him to pursue training in diabetes at the Joslin Clinic in Boston where he worked with many thought leaders in the field. Dr. Clement also spend 8 years as chief of the diabetes clinic at Walter Reed Army Hospital before he was recruited by Georgetown.

Betty Levine, MS, *Strategic Consultant & Division Head of eHealth and Telemedicine, ISIS, Georgetown University*

Betty Levine has almost 20 years of experience designing and developing large computer systems within the medical community. Ms. Levine's current responsibilities include the design and integration of information systems requirements for the MindmyHeart home monitoring and case management project for Congestive Heart Failure Patients and the design, development, and implementation of the MyCareTeam Internet-based diabetes management project. Past telemedicine projects managed by Ms. Levine include telemedicine for hemodialysis patients, deployable radiology for US troops in Bosnia-Herzegovina and Kuwait, and the development of an Internet based Home Peritoneal Dialysis management system building on the MyCareTeam platform.

Prior to focusing on web-based disease management, Ms. Levine managed digital imaging related projects for the Department of Radiology at Georgetown University. Her responsibilities included the design, installation, and implementation of digital imaging networks for the Department of Radiology at Georgetown University as well as other grant funded operations.

Before joining Georgetown, Ms. Levine worked in the Radiation Medicine Department of the New England Medical Center (NEMC), for Pratt & Whitney Aircraft and for Kaman Aerospace.

Ms. Levine received her Bachelor's of Science degree from the State University of New York at Stony Brook in Applied Mathematics and her Master's of Science Degree in Industrial Engineering and Operations Research from the University of Massachusetts at Amherst. Ms. Levine's master thesis was to develop mathematical optimization techniques for radiation treatment planning for breast cancer.

Greg Pettit, *Executive VP of Business Development*

Greg Pettit has over 25 years of experience in the computer industry. He has held various positions, including sales, sales management and strategic partnering with and for some of the largest global suppliers of computer systems and software. Mr. Pettit has a record of accomplishment of consistently achieving sales targets while maintaining high customer satisfaction. In addition, Mr. Pettit has also led Business Development opportunities that resulted in both parties realizing or exceeding the goals set for the partnership.

During his career, Mr. Pettit spent 4 years at Boeing Computer Services, 10 years at Digital Equipment and most recently 11 years at The SCO Group. While at the SCO Group, he held various roles including Director of OEM Sales and Strategic Alliances as well as Vertical Solution Provider recruiter. While in the OEM assignment for SCO, Mr. Pettit successfully engaged IBM in discussions that ended with IBM becoming a Tier 1 SCO OEM partner.

Donna Slattery, *Executive VP Marketing*

Donna Slattery has over 20 years of leadership experience in high technology marketing in the areas of corporate strategy, communications, public relations and product marketing. Ms. Slattery has developed and executed marketing plans and programs for newly formed and established companies as an employee and more recently as an independent consultant.

Before joining MyCareTeam, Ms. Slattery worked with numerous software and services companies as a consultant to develop and execute marketing programs, including Eze Castle Integration, SUN Microsystems, OmniLite, ZEFER, AXENT Technologies, and Internet Security Advantages. Ms. Slattery also was the in-house Marketing Director for onExchange, Inc, where she was responsible for jump-starting the new software company's marketing efforts.

Earlier in her career, Ms. Slattery was a senior product marketing manager at VERITAS where she was responsible for the company's Windows NT initiative and its relationship with Microsoft. She also held a variety of senior marketing positions at Digital Equipment Corporation.

Ms. Slattery holds a B.S in Math/Computer Science from the University of New Hampshire and a Masters of Science in Administration for High Tech from Boston University.
