### **MyCareTeam™ Forms Advisory Board**

*Paul Madden to head distinguished advisory team of diabetes and software technology luminaries*

**Boston, MA. – February 14, 2006** – MyCareTeam, Inc., a leading vendor of On Demand Software as a Service software applications designed to help people manage diabetes, has named Paul Madden, Dr. Steve Clement, Dr. Steve Edelman, Margie Lawlor, Martin Mullins, Dr. Deborah Pressman, Tom Reilly, and Dr. Howard Wolpert to its newly established advisory board. This group of medical and technology experts will play an integral role in providing industry insight and guidance to MyCareTeam as the company launches its first diabetes monitoring product, MCT-Diabetes, to the commercial marketplace. Paul Madden, a well-known leader in the area of diabetes, will head the advisory board.

“We are extremely pleased to have such talented and experienced members on our advisory board”, said Jim Mingle, CEO of MyCareteam, Inc. “The perspective and counsel of these individuals will be invaluable to us as we research, build and deliver products like MCT-Diabetes to the marketplace.”

The MyCareTeam Advisory Board members are well-known for their contributions in the medical field and to the software industry:

- **Paul Madden, M. Ed., CEO, Madden Consulting** – Paul Madden, M.Ed. is currently CEO of Madden Consulting and previously spent 29 years in various influential positions at the world-renowned Joslin Diabetes Center in Boston. While at Joslin, Mr. Madden’s roles included: Special Assistant to the President (17 years), Camp Administrator, Advocacy Director, Senior Development Officer, former President of ADA/New England, and Counselor. A prolific writer and world-renowned speaker, Mr. Madden has written on various topics and issues related to diabetes in numerous publications. He has also spoken throughout the world on a variety of diabetes, education, and motivational topics.
- **Dr. Steve Clement** - Dr. Clement is chief of the Georgetown Diabetes Center at Georgetown University Hospital. He also serves as interim Chief of Endocrinology, Department of Medicine, Georgetown University Hospital. In addition to running the Diabetes Center, Dr. Clement is active in clinical research, performing clinical trials on the development of oral insulin, the use of insulin to prevent cardiovascular disease, and in the prevention of Type 2 diabetes with pharmacotherapy. He has published widely and is a recognized international leader in the area of diabetes care.

- **Dr. Steven Edelman** – Dr. Edelman is Founder and Executive Director of Taking Control of Your Diabetes, a series of educational and motivational conferences and health fairs for people living with diabetes. Dr. Edelman is also Professor of Medicine in the Division of Endocrinology and Metabolism at the University of California at Davis. His postgraduate training included a residency in internal medicine at UCLA – San Fernando, a clinical fellowship in endocrinology and metabolism at The Joslin Clinic, a fellowship in endocrinology and metabolism at The Lahey Clinic in Burlington, Massachusetts, and a research fellowship in diabetes and metabolism at University of California, San Diego.
- **Margie Lawlor – M.S., Certified Diabetes Educator, Joslin Diabetes Center** – Margie Lawlor is a member of the Board of Directors for the American Association of Diabetes Educators (AADE). She is also Chair, Chapter President’s Council of the AADE. Ms. Lawlor is a certified diabetes educator for Joslin and is the Coordinator of Clinical Research & Education in Pediatrics. Ms. Lawlor has authored numerous articles on topics of interest in the area of diabetes and is a frequent lecturer on the subject. Affiliations with the Diabetes Educators of Eastern Massachusetts (DEEM) include Newsletter Editor, *The Beacon* – DEEM, Executive, Nominating Committees, President-Elect (DEEM), and President (DEEM).
- **Martin Mullins, Vice President of Technology Licensing, Georgetown University** – As Vice President of Technology Licensing at Georgetown University, Martin Mullins is responsible for the overall leadership, management, and organization of Georgetown University’s technology commercialization initiatives. Previously, Mr. Mullins served as the Director of Technology Licensing for the Royal College of Surgeons in Ireland and as Associate Vice President for Licensing and Director of the Office of Technology Transfer at Case Western Reserve University.
- **Dr. Deborah Pressman, Medical Director of Fontaine Medical Center** – Dr. Pressman oversees the Internal Medicine Practice at the Fontaine Medical Center in Harwich, Massachusetts. She specializes in the medical aspects of endocrinology, anorexia, and bulimia. Previously, Dr. Pressman was an Associate Professor of Medicine at the Allegheny Health College of Pennsylvania and completed her internal medicine residency at the Graduate Hospital of University of Pennsylvania.
- **Tom Reilly, Vice President of Enterprise Master Data Solutions, IBM Corporation** – Tom Reilly brings over 20 years of experience in the enterprise software industry to his advisory role at MyCareTeam. He also brings a wealth of first-hand knowledge about diabetes, having had Type 1 diabetes for 16 years. In his current role at IBM, he works with large healthcare, retail, banking, insurance, and automotive companies to solve their enterprise information management challenges. Before joining IBM, Mr. Reilly was CEO of Trigo Technologies and has held numerous executive positions throughout his career, including Lotus, BroadQuest, and now IBM. Mr. Reilly is an active board advisor to many technology start-ups, growth companies, and venture firms.
- **Dr. Howard Wolpert, Senior Physician, Joslin Diabetes Center** – Dr. Wolpert currently serves as a Senior Physician in the Joslin Clinic Section on Adult Diabetes and as the Director of the Insulin Pump Program for Joslin. Dr. Wolpert has long been involved in the clinical aspects of insulin therapy and is the editor of *Smart Pumping*, published by the American Diabetes Association, and *Managing Diabetes with an Insulin Pump: Indications and Interventions*, published by Joslin Diabetes Center.

“I am thrilled to be working so closely with MyCareTeam“, said Paul Madden, chair of the newly-formed MyCareTeam Advisory Board. “I’ve had the opportunity through the years at Joslin and other esteemed diabetes organizations to review many software packages. MCT-Diabetes is the first monitoring software package that I have been significantly impressed by.”

### **About MCT-Diabetes**

MCT-Diabetes is a behavior modification tool that allows individuals with diabetes and their care providers to collaborate and monitor glucose levels across the Internet. MCT-Diabetes facilitates collaboration, which improves the long-term management of diabetes. The intuitive, easy-to-use software application provides an opportunity for the patient to decide who (care providers, family members, friends) can have access to the patient's data and communicate with each other. Patients who do not wish to share access with care providers can print reports and graphs and take them to appointments for review.

### **About MyCareTeam, Inc.**

MyCareTeam, Inc. was founded to provide On-Demand Software as a Service offerings that are designed to help people with diabetes to collaborate and manage their illness while reducing overall healthcare costs. The company's diabetes offering, MCT-Diabetes, has been successfully used, with proven results, for over five years by patients, doctors and nurses to dramatically improve the health and wellness in people with diabetes and reduce overall healthcare costs. MyCareTeam is headquartered in Boston and the company's website is [www.mycareteam.com](http://www.mycareteam.com).
