MyCareTeam Adds Support to Diabetes Management Software for New LifeScan Glucose Meters

Meters supported by MCT-Diabetes is now at an unprecedented number of twenty-nine

Acton, MA. – July 17, 2008 – MyCareTeam, Inc., a leading vendor of Internet-based diabetes management software, has announced that its software, MCT-Diabetes now supports four additional glucose meters, bringing the total number of meters supported by MCT-Diabetes to an industry-leading twenty-nine. The newly supported meters include OneTouch UltraMini, OneTouch Select, OneTouch UltraLink, and OneTouch SureStep.

“Most people with diabetes use multiple meters,” said Jim Mingle, CEO of MyCareTeam. “We are unique in that our goal is to give our users the freedom to use the meter of their choosing with our software and rest assured that all of their data will be consolidated.”

MCT-Diabetes is a behavior modification tool that allows individuals with diabetes and their care providers to collaborate and monitor glucose levels across the Internet. The product facilitates collaboration, which improves the long-term management of diabetes. The intuitive, easy to use software application provides an opportunity for the patient to decide who (care providers, family members, or friends) can have access to the patient’s data and communicate with each other. Patients who do not wish to share access with care providers can print reports and graphs and take them to appointments for review.

MyCareTeam recently announced integration of MCT-Diabetes with Google Health. Google Health allows consumers to enter and maintain their own medical data and electronically send that information to systems, which are connected to Google Health. MyCareTeam’s diabetes management software, MCT-Diabetes, integrated with Google Health, will allow consumers to securely transfer diabetes related information to and from the Google Health medical data repository. The data can be transferred to any other medical applications that are also integrated with Google Health.

MCT-Diabetes is available directly from MyCareTeam on a monthly or annual subscription membership basis. Visit the company’s website at www.mycareteam.com for more information.
